Electric Toothbrushes

While brushing twice per day for two minutes, plus flossing, proves to be the standard of care, sometimes the added mechanical sweeping of an electric toothbrush can prove to be much more effective! This helps patients with limited dexterity (hand movement) or those who need the help of an electric timer to make sure we brush long enough!

We sell electric toothbrushes at our “professional” cost, usually less than retail cost at the major “big box” stores. We only clean your teeth a few times per year! You are responsible for the other 725+ times you’ll brush throughout the year! Make an investment to get the best benefit for your time spent!
